

Tyvek (2.9oz)

White

Material Description: Tyvek® combines all the best physical properties and characteristics of paper, film, and fabric – in one exceptional material. While most products offer water resistance or breathability, Tyvek® offers both. It is equally strong and protective in wet or dry conditions. Tyvek® is lightweight, flexible, smooth, particulate free, opaque, and resistant to water, rot & mildew, chemicals, abrasion, and aging. It has a high strength-to-weight ratio and is pH 7 (neutral). Made from 100% high-density polyethylene fibers, Tyvek® is manufactured in a unique flash-spinning process without the use of binders. Available in white only. Tyvek is backed by a two-year limited warranty.
