HARBORTIME® EDGE

Care and Cleaning

HarborTimeEdge is a water-repellent, mildew-resistant two-ply polyester duck fabric with pigmented hybrid vinyl resin top coating. Proper maintenance is important to achieve maximum years of enjoyable use. Routine care is quite simple, but certain procedures are recommended:

- Keep dirt, leaves, and other debris from accumulating on the fabric surface. Washing down with a garden hose on a bright, sunny day is recommended about once a month.
- To remove dirt from either side of the material, use a soft brush and a mild soap solution (such as Ivory). Do not use bleach. Rinse thoroughly with clear water and let dry completely before storing or rolling. (If accidental tears occur, repair them as soon as possible.)
- Do not store or roll up while wet. Be sure to clean and dry before storage. Mildew can grow during storage if moisture is present.
- Avoid cleaning in a commercial car wash. Do not steam or pressure wash.
- If used for boat cover, keep cover secure while trailering.
