Hydrofend® CVR Care & Cleaning

One of the best things about Hydrofend CVR is its excellent cleanability. Just use mild soap and water with a soft bristle brush and finish off with a rinse. Regular care and cleaning of Hydrofend CVR is not only easy, it helps to maintain the life of the fabric.

General Cleaning:

- Brush off loose dirt
- Prepare a solution of 2 ounces mild soap (e.g., Woolite or Dawn dishwashing liquid) and 1 gallon lukewarm water
- Use a soft bristle brush to clean
- Rinse thoroughly with cold water
- Air dry

Deep Cleaning for Tough Stains:

- Lightly spray the solution on the non-coated side. Be careful not
- Prepare a solution of 1 cup bleach and 1 gallon water to soak the fabric as overexposure to harsh chemicals may damage the fabric's coating. Do not leave on longer than 2 minutes.
- Rinse immediately and thoroughly, then air dry.
- Note: After using bleach or other harsh cleaners, Hydrofend CVR may require a retreatment to restore its water repellency. We recommend using 303® Fabric Guard™.
